Leonardo Teubal
Software Engineer

TECHNICAL SKILLS

Back End: PHP, MySQL, Symfony, Laravel, REST APIs, Webhooks, JSON.

Front End: JavaScript/ES6, Angular 8/14, TypeScript, AngularJS, Vue.js, HTML5, CSS3, jQuery.

API Integration: Delighted, Exago, ChatGPT, QuickBooks, Twilio, OAuth2, Zapier, Postman.

Testing / Debugging: Protractor End-to-end Testing (Jasmine Framework), Xdebug.

Tools and Methodologies: Git, Docker, PhpStorm, Azure DevOps, Linux, Agile (SCRUM).

PROFESSIONAL EXPERIENCE

Freelance Development & Family Relocation   Sep 2023 – Present

Project Development: Independently developed custom web solutions, including startup50x.com, while relocating to Austin, Texas, due to family commitments related to my spouse's career advancement.

Back-End: Built server-side architecture with PHP 8.3 (Laravel 10), Inertia, MySQL; integrated ChatGPT API and managed deployments via Laravel Forge.

Front-End: Developed responsive user interfaces using Vue.js, Tailwind CSS, HTML5, and JavaScript; maintained code versioning with Git.

Senior Full-Stack Software Developer   Jun 2020 – Sep 2023
Point of Rental – *Fort Worth, Texas*

Software Development: Engineered and optimized complex software solutions, utilizing PHP 7.4 (Symfony), Javascript (AngularJS, Angular 8/14), and MySQL to enhance system functionality and UX.

Collaboration & Peer Review: Engaged in peer programming and conducted meticulous peer reviews to ensure code quality and functionality, contributing to a large reduction in post-deployment issues.

Quality Assurance: Participated in the QA processes overhaul and implemented automated testing using Protractor, bolstering software reliability, and minimizing manual testing needs.

API Integration: Successfully integrated multiple external applications through robust API development, streamlining data flow and enhancing platform interoperability.

Agile Methodology: Actively participated in an Agile (SCRUM) cross-functional team, contributing to efficient project management and timely delivery through short, focused sprints.

Technology Utilization: Enhanced software development practices with the use of Linux, Docker, Azure, Git, PHPStorm and worked periodically with AWS for deployment and infrastructure tasks.

Front-End Redesign: Played a key role in redesigning the client's customer interface. Collaborated with cross-functional teams to enhance usability, improve customer feedback, and increase user engagement.

Full-Stack Software Developer
Ornsoft Corporation – *Miami*

Mar 2018 – Sep 2019

Leadership: Directed a 3-engineer team, delivering four international projects promptly within budget.

Back End: Managed development/maintenance using LAMP (Laravel 5.6), PHP 7.2, GIT, and MySQL.

Front End: Led application UI development with HTML5, CSS3, Bootstrap, and Vue.js.

API & Library Integration: Integrated APIs (Twilio, PayPal) and libraries (Open Layers, DomPDF).

Back-End Web Developer
Overseas Travel International – *Miami*

Dec 2017 – Mar 2018

Application Development: Played a key role in the back-end development of a travel application using LAMP stack (Laravel 5.4, PHP 5.6, MySQL, Linux, HTML5, CSS3, JQuery, GIT, and Bootstrap) within a three-person team guided by a project manager.

API Development: Developed a RESTful API with Laravel/Passport for efficient data access and application functionality.

Full-Stack Web Developer
Página Fácil – *Argentina*

Nov 2009 – Dec 2016

Back-End Development: Developed and maintained a SAAS CMS using PHP 5.3 and CakePHP on a LAMP stack, ensuring robust database management with MySQL.

Front-End Design: Designed user interfaces using Javascript, HTML, CSS, and JQuery, enhanced UX/UI with AJAX, Photoshop, and Bootstrap.

EDUCATION / LANGUAGES

B.A. in Computer Science, University of Buenos Aires.

Spanish (Native), English (Fluent), French (Reading).

U.S. Citizen.
